## WORKSHOP ON SMILE DESIGN

<b>Title</b>	Workshop on smile design
<b>Date</b>	28/06/22
<b>Guest Speaker</b>	Dr. Nimit Jain
<b>Conducted By</b>	Dept of prosthodontics
<b>Number Of Participants</b>	101

### **SUMMARY**

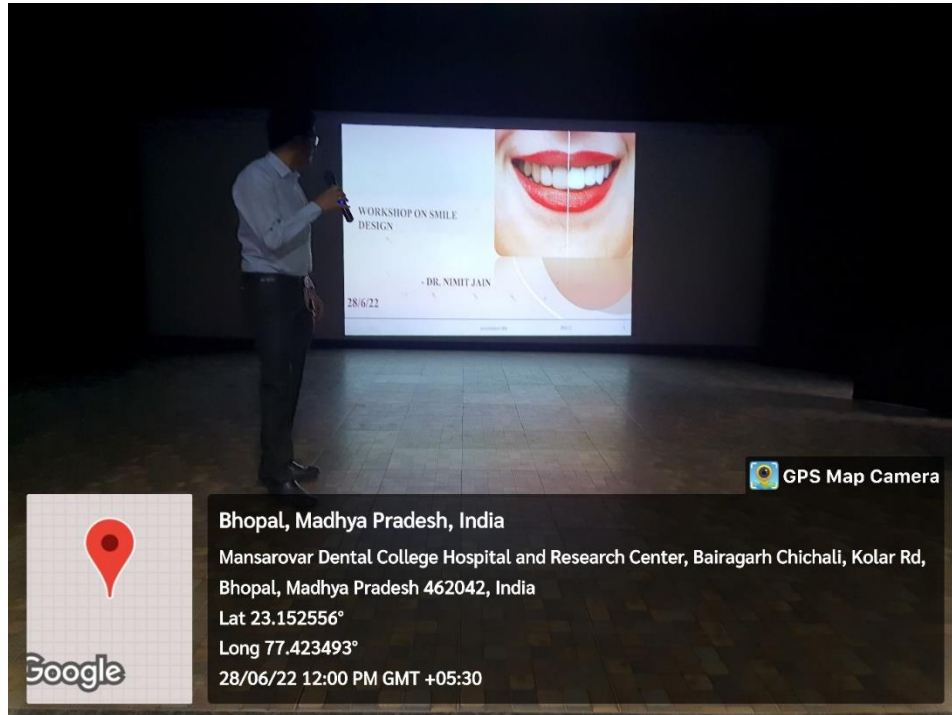

Dr. Nimit Jain conducted workshops on smile design. Digital smile design concept is a helpful tool in aesthetic visualization of patient's problem. It not only helps patients to envision their treatment outcome but also improves clinician's diagnosis and treatment planning. Digital imaging and designing helps patients to visualize the expected final result before the treatment itself starts which enhances the predictability of the treatment. The clinician can address patients concern by showing digitally the final outcome, motivating and educating them about the benefits of the treatment. It improves clinician diagnosis and treatment plan by aesthetic visualization of patients problem through digital analysis of facial, gingival and dental parameters that will analyze the smile and the face in an objective and standardized manner.

## SEMINAR ON DENTAL MATERIALS

<b>Title</b>	Seminar on Dental Materials
<b>Date</b>	05/07/2022
<b>Guest Speaker</b>	Mr. Vivek Nigam
<b>Conducted By</b>	INDUSTRY ACADEMIA COLLABORATION
<b>Number Of Participants</b>	90
<b>SUMMARY</b>	<p>Mr. Vivek Nigam gave a brief idea about Dental materials. Dental materials are subjected to many cycles of repeated stress during mastication. Materials subjected to such a stress undergo material fatigue, which means they fracture at a stress lower than the value required for a single load application. Dental materials have to be high performance materials, to survive within the complex and hostile oral environment. They will experience a wide range of temperatures, chemical exposure from food and drink, together with static and fatigue loads of up to 600N. It is therefore essential that all restorative dental materials, whether they are to be used to restore a cavity in a tooth or make a fixed dental prosthesis, such as a crown or bridge, or a removable dental prosthesis, such as a denture. He explained how to wisely do selection of dental materials.</p>

## EFFECTIVE DRAFTING OF RESEARCH, PUBLICATIONS, PATENTS AND PATENT FILING

<b>Title</b>	Effective Drafting Of Research, Publications, Patents And Patent Filing
<b>Date</b>	16/9/22
<b>Guest Speaker</b>	Dr. Siddharth sonwane
<b>Conducted By</b>	Dept. Of orthodontics
<b>Number Of Participants</b>	75
<b>Programme Report</b>	<p>Dr. Siddharth Sonwane explained patent is granted by the government, gives an exclusive right to an inventor to make, use, and sell his invention. This exclusive right is for a limited period of 20 years from the date of filing. The fundamental idea is to safeguard the inventions that are created and therefore, encourage more developments. Instructed the steps involved in a patent filing in India. <b>Conceiving your Invention-</b> This is the first step for an inventor who wants to go ahead with his or her invention. <b>Patent Search and Drafting</b> After getting clarity over the invention, the inventor must do a patentability search. This is important since it will help in understanding whether the invention is novel or not. The next step which follows is effective drafting of the patent application. <b>Filing the Patent Application</b> This is where the actual process starts. After drafting the patent application, this can be filed in the government</p>

## SEMINAR ON NOIS FOR NOISE

<b>Title</b>	Seminar on NOIS for noise
<b>Date</b>	16/12/22
<b>Guest Speaker</b>	Dr. Kartik Chaudhary
<b>Conducted By</b>	Dept. of Pedodontics and Pediatric Dentistry
<b>Number Of Participants</b>	88
<b>Programme Report</b>	<p>Department of Pedodontics and Pediatric dentistry organized a seminar on “ Nois For No Noise”. Dr. Kartik Chaudhary emphasised , elaborating the use of nitrous oxide gas, its mechanism of action, pharmacokinetics and pharmacodynamics. Technique of use, Occupational hazards and safety measures to be taken while using nitrous oxide in the machine were elaborated in great details. Many children undergoing minor procedures need effective sedation, or anesthesia, because they are frightened, in pain, ill, or have behavioral problems. Some procedures are very common and anesthetists should know what sedation techniques are effective and likely to be used by other healthcare practitioners. In children presenting for anesthesia, occasionally, it may be appropriate to use conscious sedation instead.</p>

## SEMINAR ON RESEARCH GRANT WRITING

Title	Seminar on Research grant writing
Date	23/02/2023
Guest Speaker	Dr. Devesh Pandey
Conducted By	Dept of PHD
Number Of Participants	84
Programme Report	<p>Dr. Devesh kumar explained to Start with a firm introduction: This should start out with a hook. Ideally, you want your readers enraptured from point one. Make your proposal as purposeful and useful as possible. Use some background information to get your readers in the zone. Then state the purpose of your proposal</p> <p>Propose Solutions: This is arguably the most important part of your proposal. The solutions section is where you get into how you will address the problem, why you will do it in this way, and what the outcomes will be :</p> <ol style="list-style-type: none"><li>1. Discuss the larger impact of your ideas</li><li>2. Addressing why you will do something is important</li><li>3. Your readers should leave your paper assured that you can solve the problem effectively</li><li>4. Research your proposal extensively</li><li>5. If your proposal doesn't prove that your solution works, it's not and adequate solution.</li></ol>

## WORKSHOP FOR GOOD CLINICAL PRACTICE

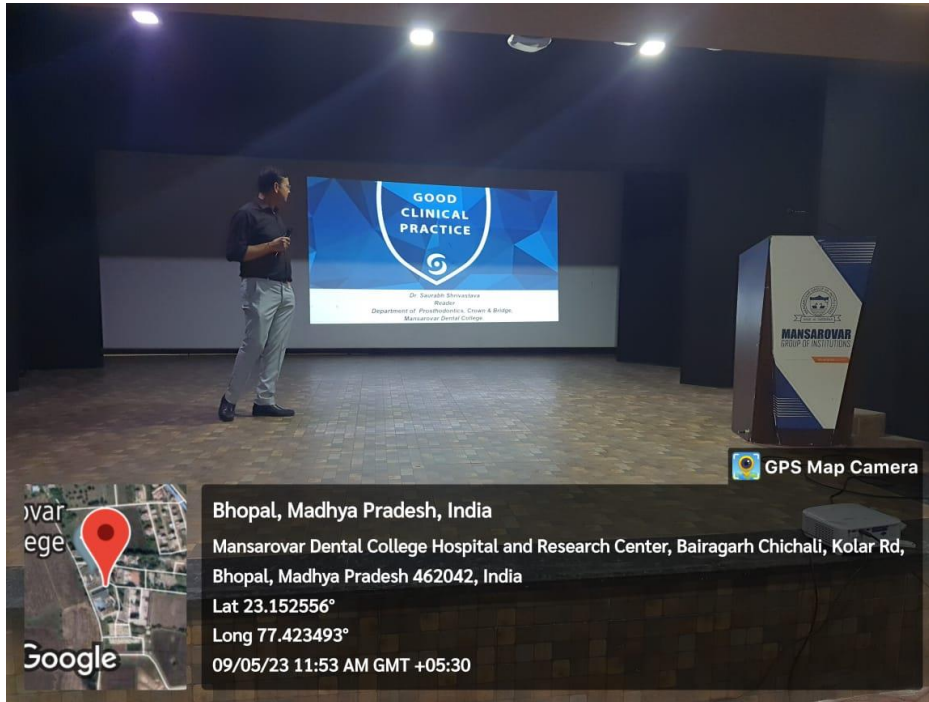

Title	Workshop for Good Clinical Practice
Date	9/5/23
Guest Speaker	Dr. Saurabh Srivastava
Conducted By	Dept of PROSTHODONTICS
Number Of Participants	112
Programme Report	<p>Dr. Saurabh gave overview of the history of Good Clinical Practice (GCP) statute traces back to one of the oldest enduring traditions in the history of medicine: The Hippocratic Oath. As the guiding ethical code it is primarily known for its edict to do no harm to the patient. However, the complexities of modern medicine research necessitate a more elaborate set of guidelines that address a Physician's ethical and scientific responsibilities such as obtaining informed consent or disclosing risk while involved in biomedical research. Good Clinical Practice is a set of guidelines for biomedical studies which encompasses the design, conduct, termination, audit, analysis, reporting and documentation of the studies involving human subjects. The fundamental tenet of GCP is that in research on man, the interest of science and society should never take precedence over considerations related to the well being of the study subject. It aims to ensure that the studies are scientifically and ethically sound and that the clinical properties of the pharmaceutical substances under investigation are properly documented.</p>
